

Heat Treatment

Feroli & Gianotti SpA

Established in 1959

Trattamenti Termici Feroli & Gianotti S.p.A. is a commercial heat treater of metals working for all mechanical fields. For the aerospace sector We perform following heat treatments: oil and gas quenching, tempering, stress relieving, solution (austenitic-martensitic stainless steels), precipitation hardening, aging, sub-zero. The treatments can be performed in medium vacuum furnaces or in nitrogen atmosphere. The Company operates in this sector from 20 Years and boast relationship with all the major aerospace and aeronautical Industries at International level. The EN aerospace certification was achieved since the 2004 and NADCAP Accreditation in the 2015, mandatory acknowledgments to operate in this field.

In the 2018, thanks to the collaboration with an important Aeronautical Industry, We have qualified an Induction hardening H.F. process. Some news: We are going to test two new furnaces dedicated to aeronautical parts in aluminium alloys and a laser hardening plant is coming, which will work for the beginning of 2020.

The Company is Certified EN 9100:2016 (aerospace), UNI EN ISO 9001:2015 (quality), UNI EN ISO 14001:2015 (environment) and accredited NADCAP for heat treating.
